

## **COVID Response Committee Report**

University Council

1 December 2021

As co-Chairs of the committee, Dr. Poulsen and I present this report on behalf of the COVID Response Committee. The CRC has met twice since the last meeting of the University Council working on **Giving Voice** to faculty, staff and students through various means of data collection, **Listening** to responses from the administration re: questions and concerns, and **Reporting Back** what we learn to the University Council. Thank you to all who have responded to the survey as well as to individual email messages we have received. The committee is working on a revised survey based on the data received to date and anticipates releasing the survey prior to the holiday break. We have had regular meetings with President Morehead's assistant, Alton Standifer, to provide on-going updates and to share concerns. We are here to be of service and to help with communications from the university community to the administration. We do want to say thank you to the administration and task force members for their hard work. We also want to give special thanks to those at the University Health Center for their on-going heroic efforts in keeping our campus safe with vaccinations and boosters, as well as care for those testing positive for COVID. This concludes the report from the COVID Response Committee.
