

University Council Statutes and Bylaws Committee Report
February 5, 2009
Elizabeth A. St.Pierre, Chair

University Council's Statutes & Bylaws Committee has met three times this year. As you may remember, during the last few years we have revised Council's bylaws to increase the number of both faculty and staff on Council. Last year, our student representatives asked us to consider increasing the number of students as well.

To that end, our committee has been collecting data from various sources to determine exactly how Council's numbers in the various categories—faculty, staff, students, administrators—have increased during those years in order to determine whether and how to increase the number of student representatives.

I believe we have the data we need, and the committee should make a recommendation very soon.
