

## April 15, 2026 | SGA University Council Report

### Intro

- Wanted to give thanks to previous SGA administrations —> hope to build on great work they have done
- As we look ahead, our primary focus is strengthening outreach and ensuring that **student voices are consistently heard and represented.**
- We aim to serve as a bridge between students and administration, bringing forward clear, thoughtful feedback that reflects the student experience.

### Initiatives

- Through that outreach and listening, several key priorities have emerged for our administration this year:
  - **Affordability and accessibility** across the student experience
  - **Student voice and SGA accessibility**, ensuring feedback is not only collected, but acted upon
  - **Improving campus systems** to better support student success
  - **Continuation of legacy initiatives** including the Professional Clothing Closet and Food for Fines programs

### Next Steps

- As a next step, we are building on conversations around artificial intelligence, including participating in the beta testing of the AI Literacy for All course, and look forward to exploring how we can support student access and literacy in this space.
- Additionally, if anyone is open to meeting, we would love the opportunity to introduce ourselves and learn more about your work and how SGA can best support your efforts.

Thank you again for your time.

And as always, Go Dawgs.
