

Report of the Committee on Intercollegiate Athletics to the University Council
November 29, 2012

Members (2011-2012): Rodney Mauricio (Chair), Tony Capomacchia, Robert Moser, Alan Campbell, Lonnie Brown, Peggy Kreshel, Margaret Robinson, David Shipley (Faculty Athletics Representative), Carla Williams (Athletic Director Representative, Ex-Officio), Meredith Martin and Jason O'Rourke (student representatives).

This is our summary report covering meetings since our last report to Council in August, 2011, and covering the activities of 2011-2012.

The committee met on August 24, 2011 and elected Rodney Mauricio as Chair of the committee. All of the committee members had previously served on this committee, so very little effort was allocated to educating the committee on the academic workings of the athletics department.

One of the primary responsibilities of the Committee on Intercollegiate Athletics is to review the academic mission of the athletics department. In order to execute this responsibility, the committee met on April 24, 2012 with three groups: head coaches, academic support staff and student-athletes. We met with each group separately and discussed the academic issues each group faced.

The twelve head coaches present were uniformly positive about the performance of the academic support team and about the balance between athletics and academics for student-athletes. Concerns were raised about PE credit for athletes (whether participation on a team satisfies the UGA PE requirement). As in past years, coaches raised questions about some inflexibility on behalf of instructors with respect to test-taking, attendance policies, timely grade feedback. The coaches emphasized that the vast majority of faculty and academic departments are supportive of student-athletes. There were questions about whether student-athletes should be provided excused absences for athletic travel since the student-athletes are traveling on university business. Coaches also expressed some frustration with the withdrawal policy since student-athletes must take 12 credits or endanger eligibility. Students were previously advised to take 15 credits and then withdraw from a class if the schedule was too difficult, but that strategy is not possible when students are restricted to only 4 withdrawals.

The entire academic support staff was present for the meeting and expressed general satisfaction with the system as it is presently operating. Staff mentioned that class scheduling was a major hurdle for student-athletes, although summer school was helpful in keeping students on track. The staff also had some specific issues with scheduling classes in the Grady College, with KINS 2010 and some communication studies classes. An especially problematic issue arises in trying to schedule student teaching for student-athletes in the College of Education. Again, although most faculty are flexible with respect to student-athletes travel, there are persistent issues that arise. The issue of excused absences came up here as well. The staff was also interested in seeing how new distance education technology might be helpful in keeping student-athletes connected to courses while they travel. The committee is always impressed with the professionalism and sincere concern the academic support staff has for the academic performance of student-athletes.

Finally, we met with a large group of student-athletes from a variety of sports. As always, student-athletes at UGA come across as an impressive group of students who work very hard in a demanding academic climate. Students expressed some concerns about the scheduling conflicts that arise between athletics and classes, especially with respect to labs and studio classes. Classes in Grady were particularly problematic since there are few classes not taught in the afternoon. There were many examples of students being limited to specific majors because scheduling conflicts were too cumbersome. Student-athletes also feel like they are being forced to take online classes to complete requirements and that taking classes online is a common practice among student-athletes. They also point out that getting across campus can be challenging and that the athletic department attendance checkers often leave too early. Students also complained of often being “stuck in the middle” between coaches and advisers and teachers.

Another function of the CIA is to monitor and report on the academic progress of the student-athletes. David Shipley, the Faculty Representative to the NCAA, provided some data on academic performance and these are attached to this report.

The committee is satisfied that the Athletic Association and academic support staff do an excellent job of supporting and monitoring student-athletes. Greg McGarity, the Athletic Director and his support staff, as well as the coaching staff, seem committed to a high academic standards.

Respectfully submitted

Rodney Mauricio, PhD
Chair, Committee on Intercollegiate Athletics

UGA Graduation Success Rate Improves To Record 81% for All Student-Athletes

Oct. 25, 2012

ATHENS — University of Georgia student-athletes graduated at a rate of 81% in the latest NCAA Graduation Success Rate (GSR) survey period according to figures released Tuesday by the NCAA. That's up from 79% a year ago and is the highest graduation percentage for the Bulldogs since the GSR was implemented in 2005.

RELATED CONTENT

In the GSR four-year average rate, University of Georgia athletic teams improved in nine sports including men's basketball, football, men's golf, men's swimming and diving, women's basketball, women's cross country/track and field, women's golf, softball, and equestrian.

Five sports remained the same and three experienced small declines. Georgia had a record five teams score a perfect 100 percent – men's golf, women's golf, gymnastics, softball, and women's tennis.

Among Southeastern Conference schools, Georgia was first in six sport categories— 2005 football freshmen (86%), softball (100%), gymnastics (100%), women's golf (100%), women's tennis (100%), and women's track and field (95%). Georgia was second among SEC schools in soccer (95%) and men's swimming (90%). The Bulldogs finished among the top six SEC schools in 12 sports.

The four-year average rate includes not only freshmen but transfers in and out of the institution. The current report tracks the freshman classes of 2002-2003-2004-2005.

"It's gratifying to see that our student-athlete graduation rates continue to improve each year and that 14 of our 17 sports improved or remained the same," said UGA Director of Athletics Greg McGarity. "Our coaches and academic support staff deserve credit for their daily focus on the academic progress and well-being of all our student-athletes. The annual report is encouraging and there is still room for more improvement. All our coaches and staff are committed to that effort."

The attached information is a GPA ranking of all sports for grades earned during the 2010-11 academic year. The information shows the winners of the "Faculty Athletics Representatives Award", which recognizes the male and female teams with the highest grades for the year. The winners are men's cross country and women's swimming. Congratulations to both teams!

Winners of Faculty Athletics Representatives Award

1992-93	Men's Swimming	Women's Volleyball
1993-94	Men's Track	Women's Golf
1994-95	Men's Golf	Women's Golf
1995-96	Men's Tennis	Women's Golf
1996-97	Men's Tennis	Women's Golf
1997-98	Men's Tennis	Women's Golf
1998-99	Men's Tennis	Women's Swimming
1999-2000	Men's Tennis	Women's Tennis
2000-01	Men's Tennis	Women's Swimming
2001-02	Men's Golf	Women's Volleyball
2002-03	Men's Golf	Women's Equestrian
2003-04	Men's Golf	Women's Soccer
2004-05	Men's Golf	Women's Golf
2005-06	Men's Golf	Women's Swimming
2006-07	Men's Golf	Women's Gymnastics
2007-08	Men's Golf	Women's Gymnastics
2008-09	Men's Golf	Women's Golf
2009-10	Men's Swimming	Women's Swimming
2010-11	Men's Cross Country	Women's Swimming

Academic Report:

Board Secretary and Faculty Athletics Representative David Shipley highlighted some of the individual academic awards received Georgia's student-athletes in 2011-12 including achievements by Drew Butler, Wendy Trott, J.P. Hackney, Aaron Murray, Ty Frixx, Aron White, Chris Burnette, and Noel Couch. The Board materials included a long list of Academic All-Americans. He said that he had presented the FAR Award to Gymnastics at the Buffalo game in recognition of that team's impressive 3.46 GPA, highest among all men's and women's teams. He also presented the Eaves Awards to swimmer Andrew Gemmel and equestrian Maria Salazar. They are the rising seniors with the highest GPA's among all of UGA's male and female athletes.

Shipley then asked the Board to look at the final 2011-12 grade point rankings for Georgia's teams. The GPA for all sports was 3.00, up from 2.96 in 2010-11; the men had improved to 2.84 from 2.80; and the women went from 3.10 in 2010-11 to 3.16 in 2011-12. The teams with the greatest improvement from 2010-11 to 2011-12 were gymnastics, women's cross country, equestrian, men's tennis and football.

He completed his report by discussing his meetings with SAAC, commenting about the changes at Rankin-Smith, proctoring exams for student-athletes, and reviewing proposed NCAA legislation with the Association's senior administrators.
