

GSA Standing Report

November 19, 2014

Peyton Bell

The Graduate Student Association continues working toward our two goals of the year: 1) Engaging graduate students in major policy decisions at the University and 2) Structuring GSA to better engage graduate students on an annual basis.

In doing this we are working to better understand how the change in the summer commencement program will impact graduate students – particularly those at the PhD level.

We are also working to find creative and effective ways to provide structure for our organization going forward. This is particularly important as we work closely with SGA to reform both our Constitution and the SGA Constitution.
