Introduction in UC

- Introducing myself, Jim, and Brittany
    - o Excited to get started; hit the ground running
- Brief explanation of platform
    - o Focus on laying the ground work for the big projects
        - Completion of plenty of feasible platform points
            - They aren't all revolutionary, many can be done by simply using the resources that are already provided to us.
    - o Major focus on reforming SGA as it stands
        - Reassessing our own budget and cutting the excess to fix issues we have now
        - Plan on relying on ourselves as an organization more than in the past
    - o Our biggest asset, and potentially the hardest aspect of our platform is reaching out to students to gain their perspective
        - We all know voter turnout is low
        - A lot of students don't know or care what SGA does, we want to fix that.
        - One of our goals is to extend our reach further than ever so that you all know that when a resolution is brought before UC from SGA, there is widespread student support for it, not just a group of students in a room making decisions.
            - That way the issues we talk about are issues that matter
- Finally, we may be acting as the voice of the student body, but we are also here to work with/for you all. If any of you need anything from us, we are here to help.

Drew Jacoby
SGA President
